

MONTHLY REPORT OF RIVER AND FLOOD CONDITIONS

REPORT FOR:

MONTH

November

YEAR

1999

SIGNATURE

Gregory Waller

In Charge of HSA

DATE

December 6, 1999

TO: Hydrometeorological Information Center, W/OH2
NOAA / National Weather Service
1325 East West Highway, Room 7230
Silver Spring, MD 20910-3283

When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41).

☒ No flood stages were reached in this HSA for the month above.

November was another in a series of dry months for West Central Texas. Due to the ongoing drought...many counties across the area remain in an outdoor burning ban. Also...the cities of San Angelo and Abilene continue to water restrictions.

Rainfall was well below normal for November, with yearly totals remaining well below normal. San Angelo officially received a trace of rain in November, which is 1.08 inches below normal. Abilene officially received no rainfall, 1.48 inches below normal. For the year, San Angelo remains below normal with 13.42 inches (6.23" below normal). Abilene also remains well below normal for the year with 16.32 inches, 7.05 inches below normal. Most cooperative observers' also reported no rainfall for November. Those few that did include:

Albany	0.05
Silver Valley	0.06
Telegraph	0.02

The soil moisture remains dry across West Central Texas, and the threat of flooding remains low.
